Hello Everyone;

For the past sixteen years we have been committed to helping women with breast cancer in every way that we can. Anywhere from advocating, supporting, encouraging, and sharing. One never knows the impact that this disease has on patients until it strikes close to home. I am so passionate about the Branch of Hope plays in supporting and caring for individuals and their families. In addition, we are now on a quest to answer the Macedonian call to help our sisters in the Caribbean and will be embarking on a new venture beginning in December when our Founder Leila Springer along with Dr. Juliet Daniel will be sharing the message with the women in Barbados. May of 2018 will see us in Runaway Bay Jamaica as we do our best to help support and educate our sisters there. June 2018 we will be partnering with a team in Trinidad & Tobago to host a Caribbean Conference where we will have an opportunity to speak with women from across the Caribbean and Latin America to share our knowledge with them and help them cope with a disease that has a very high rate in triple negative breast cancer a strain that is found in women of African Ancestry. It strikes when we are very young, it is very aggressive and has a very high mortality rate.

Come out and join us on Sunday August 20th as we host our annual brunch in Brampton where we will be sharing more information as we celebrate life.

Saturday August 26th is our annual walk and we need you there. Please remember to register and encourage your friends to register for the walk, never have we needed the help of everyone like today. It is not only the funds that we need but the numbers to show support and give us the power we need to approach the government to ask for the much-needed help. Let us fill the park this year and give breast cancer a knock out punch!

If you have not yet registered please do so today. https://www.gifttool.com/athon/AthonDetails?ID=2132&AID=3595
